Pitch. Write. Edit. Publish.

A collaborative writing platform built for authors and contributors who take their craft seriously.

01 — Accounts & Profiles

● Dual-role registration	Sign up as Author, Contributor, or both — your dashboard adapts to your role.
● Email / password sign-in	Secure account creation with hashed passwords and session management.
● Google OAuth	One-click sign-in and account creation via Google.
● Editable profile	Set your bio, genre interests, media interests, editing specialties, experience level, and open-to-approach status.
● Public profile pages	Discoverable pages showing your reputation score, Ink balance, contribution stats, achievement badges, and specialties.
● Profile visibility control	Toggle your profile between public (discoverable) and private at any time.
● Pro member badge	A "Pro" badge displayed on your profile card and in contributor search results.
● Contributor discovery	Search all public contributor profiles by role, genre, specialty, and experience level.

02 — Projects & Authoring

● Project creation	Start from a blank page or upload an existing manuscript (PDF, DOCX, TXT, MD, RTF).
● Prose editor	Rich-text Tiptap editor with chapter/section headings, bold, italic, underline, alignment, and live word/character count.
● Script editor	Fountain-syntax editor with automatic element cycling (Scene Heading, Action, Character, Dialogue, Parenthetical, Transition). Tab/Enter shortcuts and live page count estimate.
● Version history	Snapshot your manuscript at any point and restore any previous version.
● Content sharing modes	Choose to share the full manuscript text or a synopsis only with collaborators to protect your work.
● Collaborator limit (Free)	Up to 6 collaborators per project on the Free tier.
● Collaborator limit (Pro)	Unlimited collaborators per project on the Pro tier.
● Active project limit (Free)	1 active authored project on the Free tier.
● Active project limit (Pro)	Unlimited active projects on the Pro tier.

03 — Structure Planner

● Project-level planning board	Map out a book, TV series, or serial before writing — separate from the manuscript editor.
● Card grid view	Visual overview of all episodes or chapters as cards, each showing title, status, progress bar, tags, and assignee.

- **Card detail panel** Per-card breakdown: logline, beat-by-beat synopsis, thematic arcs, character appearances, word count target, due date, and assignee.
- **Status workflow** Four stages — Draft, Outlined, Writing, Complete — with colour coding and per-card progress bars.
- **Overall progress bar** Live aggregate progress across all cards in the project, updated as statuses change.
- **Search and filter** Filter cards by status; search by title or content across the entire board.
- **Character tracking** Log which characters appear in each episode or chapter for continuity management.
- **Arc tracking** Tag thematic arcs per card to track narrative threads across the structure.

04 — Collaboration

- **Join requests** Contributors apply to a project with a custom introduction message; the owner accepts or declines.
- **Direct invitations** Project owners can invite specific contributors directly. Accepting earns the owner Ink.
- **Collaborator roles** Two roles: Owner (full control) and Contributor (read/suggest access).
- **Pitches board** Post early-stage ideas — Book, Script, or Open format — to find collaborators or gather community interest.
- **Pitch invites** Directly invite a specific contributor to a pitch you have posted.
- **Saved contributors** Authors can bookmark contributors to a private shortlist for future projects.
- **Direct messaging** Secure 1-on-1 inbox between authors and contributors for private communication.
- **Insight stats** Author-facing dashboard: total suggestions received, acceptance rate, and contributor activity over time.

05 — Suggestions System

- **Inline suggestions** Contributors highlight any passage and propose a change with an explanatory comment.
- **Accept** Accepting a suggestion automatically applies the edit directly to the manuscript.
- **Discard** Authors can discard suggestions that are not a good fit, with no change to the manuscript.
- **Suggestion history** Full record of every suggestion per project — status, contributor, timestamp, and the proposed text.

- **Ink earn on submit** Contributors earn +2 Ink for every suggestion they submit.
- **Ink earn on accept** Contributors earn +10 Ink when an author accepts their suggestion.

06 — Publishing & Discovery

- **Publish to platform** One-click publishing with three visibility settings: All members, Matched readers, or Contributors only.
- **Community feedback toggle** Enable or disable public comments on your published work, and set comment visibility to public or private.
- **Discover board** Browseable feed of all published works; filterable by genre and format.
- **Star ratings** Readers give star ratings to published work; aggregate score displayed on the project card.
- **Export — EPUB** Download your manuscript as a Kindle-ready EPUB file.
- **Export — DOCX** Download as a Microsoft Word-compatible DOCX file.
- **Export — PDF** Download as a formatted PDF document.
- **Published credit (Ink)** Contributors earn +25 Ink when a project they contributed to is published.

07 — Ink Currency System

- **Ink balance** A personal reputational currency that accumulates with every platform contribution.
- **Ink badge** Displayed on your own profile, public profile pages, and the dashboard header — three sizes (sm, md, lg).
- **Ink Level card** Shown on your own profile with current balance, recent earn history, and your referral code.
- **Earn — suggestion submitted** +2 Ink each time you submit a suggestion to a project.
- **Earn — suggestion accepted** +10 Ink when an author accepts one of your suggestions.
- **Earn — collaborator added** +5 Ink when you are added as a collaborator on a project.
- **Earn — published credit** +25 Ink when a project you contributed to is published.
- **Earn — invite accepted** +5 Ink to the project owner when a collaborator they invited accepts.
- **Earn — Pro collaborator bonus** +15 Ink bonus to the owner when the accepted collaborator is a Pro member.
- **Earn — referral signup** +15 Ink when someone registers using your personal referral code.
- **Earn — referral Pro upgrade** +50 Ink bonus when a referred member upgrades to a Pro subscription.
- **Ledger history** Every earn event is logged with its label, associated project name, and timestamp.

- **Redeemable for** Subscription discounts (live). Merchandise, book printing, and professional editing services (coming soon).

08 — Referral System

- **Personal referral code** A unique 8-character code automatically generated for every member.
- **Code displayed on profile** Your referral code is shown in the Ink Level section of your own profile page.
- **One-click copy** Copy your code to the clipboard instantly with a single button press.
- **Signup tracking** When a new user registers using your code, +15 Ink is credited to you immediately.
- **Pro upgrade bonus** +50 Ink credited to you if a referred member later upgrades to a Pro plan — awarded once per referral, no double-counting.
- **Fraud safeguard** A proInkAwarded flag ensures the upgrade bonus is only ever paid once, even if a user is toggled between tiers.
- **Referral code preview** An endpoint resolves the referrer's display name from a code before the new user completes registration.

09 — Reputation & Achievements

- **Reputation score** 0–100 numeric score derived from contribution volume and author acceptance rates.
- **Score displayed publicly** Shown on your public profile alongside your Ink balance.
- **Achievement badges** Tiered Bronze ! Silver ! Gold ! Platinum milestones awarded automatically by the system.
- **First Mark** Awarded for submitting your first suggestion.
- **Trusted Voice** Awarded when you reach a high acceptance rate across multiple authors.
- **Master Editor** Awarded for reaching a significant volume of accepted suggestions.
- **Published Credit** Awarded when a project you contributed to is published on the platform.
- **Badges on public profiles** All earned badges are displayed on your public profile and in contributor search results.

10 — Intellectual Property Protection

- **SHA-256 content fingerprinting** Generate a cryptographic hash of your manuscript at any point to establish a verifiable authorship timestamp.
- **IP Agreements** Customisable legal templates that collaborators must sign before they can access the manuscript.
- **Access logs** Automatic record of every time a collaborator views the full project text — timestamp and user logged.

- **Contribution certificates**

Downloadable signed PDFs listing all of a contributor's accepted suggestions as formal proof of their work.

11 — Admin

- **Platform stats dashboard**

Live counts of total users, projects, published works, suggestions submitted, and suggestions accepted.

- **User management**

Grant or revoke Admin and Pro status, view per-user contribution statistics, and delete accounts.

- **Pro upgrade triggers Ink**

When an admin upgrades a referred user to Pro, the referrer's +50 Ink bonus is automatically awarded.

- **Activity feed**

Live log of key platform events: new signups, publications, and significant activity.

- **Moderation controls**

Admins can manage project and user status across the platform.

12 — Subscription Tiers

Feature	Free	Pro
Active authored projects	1	Unlimited
Collaborators per project	Up to 6	Unlimited
Pitches board listing	Standard	Priority placement
Profile badge	—	Pro badge
Export formats	All formats	All formats
Early access features	—	Yes
Ink earn events	All	All + Pro bonuses
Referral Pro bonus	—	+50 Ink per upgrade

**Built for writers
who take craft seriously.**
